FW-6432

Fanless Network Appliance with 500MHz VIA® ULV Eden CPU

Features

Fanless

The lifespan of this network appliance lifespan has been extended by removing the most easily damaged component, the fan.

VIA PadLock™

The VIA PadLock™ Security Engine is hardware based security technology that provides the latest military-grade encryption and protection with an extremely fast x86 security engine. When enabled by applications this has little or no impact to the performance of applications being executed.

Screwed Power Lock

This power plug is made to screw directly into the appliance chassis, allowing secure power connection in even the harshest of settings.

Dust Proof

Solid chassis design with a fanless interior allows for this product to be completely dustproof when installed correctly, insuring longevity of the product.

VIA Eden™ Processor

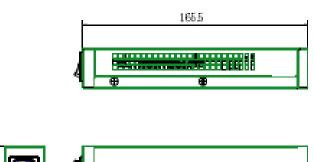

The onboard VIA Eden™ processor is designed for ultra low power consumption, rock solid reliability and compatibility with standard x86 operating systems and software applications.

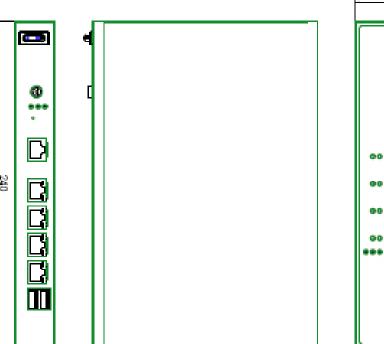

Compact Design

Engineered for applications with limited space, this product has dimensions that permit deployment in small cabinets, machinery, and almost any place necessary.

Dimensions: 240 x 30 x 165 mm
