

# FW-7575

**1U rackmount Network security platform with Intel Sandy Bridge Gladden processors**

## Features

### Using Intel® Next generation Crystal Forest Platform with Cave Creek PCH

The Intel® code-named “Crystal Forest” platform will handle data processing across the network more efficiently and securely, especially for handling cloud computing and content delivering. Intel® built-in DPDK can improve five times network performance over previous generation of Intel® platforms. Intel® Cave Creek chipset comes with Quick-Assist™ technology, it processes and accelerates packet workloads in cryptography, compression and deep packet inspection.

### Two Pairs of Generation 3 Bypass

Each pair of Generation 3 bypass ports can be programmed to turn on and off. They also allow data packet through when the appliance is powering on and off.

### Solid Expansion Capabilities

In addition to the default 2.5” SATA HDD and PCI-E\*8 golden fingers, there is the option of having the FW-7575 fitted with a 3.5” HDD bay. Also available is one Type II CompactFlash slot.
