## Fanless Vehicle PC with Intel Atom D2550 Processors Preliminary Specifications

### Features

#### Fanless Design with Corrugated Aluminum

The corrugated aluminum casing allow heat to dissipate off the top of the platform allowing for a fanless design.

#### Design for MIL-STD-810G with Extreme Operating Temperature

This product is ruggedized to support a wider than usual range of temperatures. Outfitted with industrial components (HDD/SSD, CF, Memory) this appliance can thrive in harsh conditions from -30 to 60°C.

#### Vehicle Ignition Power Management

Detects the ignition on/off status and allow to control delay time by flexible setting via software utility.

#### 3G Ring/SMS System Power On

LVC-5550S can be turned on remotely via 3G module by making ring call or sending SMS.

#### 3G Voice Communication

This vehicle PC supports 3G voice communication which allows people can communicate with operating center through voice directly.

#### Diversity of Digital Input/ Output and Relay Support

LVC-5550S supports 2x DI (Digital Input from MCU) which can connect sensors to detect the environment. Once certain events occur, LVC-5550S can be turned on automatically. DI/DO supports 12V level for easy usage with vehicle parts. 1 x relay (2A, 12V/24V) is supported for bigger driving capability.

#### Design for MIL-STD-810G with Extreme Vibration Resistance

LVC-5550S is in compliance with MIL-STD-810G in vibration and shock with SSD storage.
